GENERAL INSTRUCTIONS

This Ford Car Master Parts Catalog contains replacement parts and accessories information for the Ford, Fairlane, Thunderbird and Falcon passenger cars for the model years 1960 through 1964. This "Text" catalog is to be used in conjunction with "Illustration" catalog, Form AF-7682.

The driver's side is the left hand side of the vehicle and should govern in determining such parts as fenders, lamps, etc. as to whether a part is right or left hand.

Refer to the Index above for a listing of the various items appearing in the General Information Section.

SECTION, GROUP and BASIC NUMBERS

For greater convenience this catalog is divided into specific sections; such as brakes, front suspension, engine, transmission, etc. For example, FRONT SUSPENSION appears in section 30, STEERING in section 35, REAR AXLE in section 40, etc. The applicable exploded illustrations are contained in separate sections which are related to the text section numbers. For example STEERING illustrations appear in Illustration Section 35 of the "Illustrations" Catalog, Form AF-7682.

The basic part number groups and the section numbers under which each is listed are shown on page number VII of this general information section.

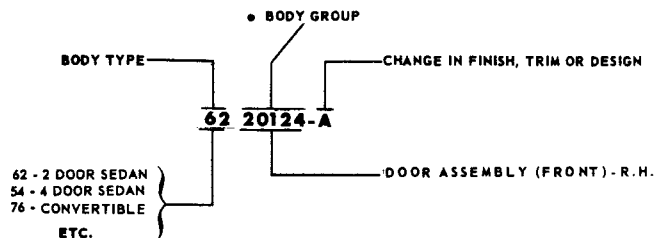

The basic part number groups shown on page VII have been expanded as shown in the Charts on pages IX, X, XI to provide for additional groups to accommodate new lines. In numerical listings, expanded numbers will be considered to follow the same sequence as the regular basic numbers from which they are expanded and are arranged in Catalogs as follows.

3538
3C538
3634
3A634

Illustrations contain basic group numbers only, therefore, it is necessary to refer to the basic group within this "text" catalog for complete applicable part numbers.

BASIC BODY PARTS NUMBERING SYSTEM

FOLLOWING IS A DIAGRAM OF THE BASIC BODY PARTS NUMBERING SYSTEM

- These five digits comprise the Body Group Numbers as used throughout each body parts section.

A complete group index of body parts has been included at the beginning of the body area. The index is divided into areas of the car in alphabetical sequence; see the first page of the Body Index Section.

EXPLANATION OF SYMBOL ★

★ Symbol indicates part is not supplied for service due to the following:

- a. Part is superseded and replaced as indicated in the description column of text.
- b. Part can be improvised as indicated in the description column of text.
- c. Due to its function there would be little or no demand.

Note: Always refer to the description column of the text for possible substitution, or for material specifications and dimensions which may be helpful in obtaining the non-serviced part locally.

CATALOG MODEL CODES

(A)	Ford	(B)	Fairlane (62/)	(S)	Thunderbird	(X)	Falcon
(A)	Fairlane (60/61)						

BODY TYPE CODES

Most body parts and some chassis parts are identified by Body Type Codes. A complete listing of body type codes is shown on pages XIV, XV of this General Information Section. Similar body types are identified by the same code number; the body type suffix is used to identify a particular body type. For instance, in 1960/61 the body type code 58 was used as follows:

<u>Body Type Code</u>	<u>Body Type</u>
58A	Fairlane "500" 4 Door Sedan
58E	Fairlane 4 Door Sedan
58F	Custom "300" 4 Door Sedan

Body type codes (less suffix) are shown in the model column of the catalog text or with illustrations titles when all body types of a related group are affected. For example, when body type code 58 is shown, it includes 58A, 58E and 58F.

MODEL YEAR APPLICATION

Model year application is indicated by showing the first year followed by a diagonal line to indicate continued usage in all subsequent years until the insertion of the last year of usage, which will then be inserted after the diagonal line. If no diagonal line is shown the part is applicable only to the year shown.

Example:

- 60/ indicates part used 1960 through 1964 in this catalog and for subsequent years as indicated in the 1965/ catalog.
- 61/63 indicates part used 1961 through 1963 model years.
- 62 indicates part used 1962 model year only.

CATALOG FORMATS

Various formats are used throughout this catalog to coincide with the normal procedure for selecting the affected part numbers. Most areas of the catalog use a format arranged in the order shown below:

Column

- 1 Model year
- 2 Type of vehicle or equipment within a specific model year
- 3 Description, size, etc.
- 4 No. required per vehicle
- 5 Complete part number

Formats peculiar to a particular area of the catalog are generally self explanatory. When necessary, instructions are shown at the beginning of the affected group. For instance, the various charts and parts list method of cataloging in the Carburetor Section are explained on Page 469 of Section 95.

PARTS IDENTIFICATION

To assist in the identification of various parts and major assemblies, identification numbers are shown on the parts themselves or on tags or plates attached to selected major assemblies. Reference to identification numbers is made throughout the catalog, and cross reference charts are provided in some areas to facilitate the selection of the service part number when the identification number is known. It is most important that identification tags and plates be retained with the part or assembly with which they are originally furnished.

MODEL IDENTIFICATION SECTION

Following this General Information Section is a Model Identification Section which includes pictures of the various car lines by model year. This section is provided to assist in the identification of a vehicle when the patent or warranty plate information is not readily available.

STANDARD and UTILITY HARDWARE

Standard and utility hardware, such as bolts, screws, fittings, etc. are listed below the part with which they are used. To facilitate the stocking and handling of standard and utility parts by Ford dealers, locator codes are preassigned by Ford Motor Company. The locator codes are shown in parentheses immediately following or below the standard and utility part numbers. For an example, refer to Body Section 030, Page 941, Group 03086. The part number for a No. 8 x 1" cross recess oval head screw is 52376-S13 and the locator code is U296. In the catalog this item will be shown as 52376-S13 (U296).

AUTOLITE SALES PART NUMBERS - LOCATOR CODES

To facilitate the stocking and handling of those service parts which are assigned both Parts and Accessories Part Numbers and Autolite Sales Part Numbers, the Autolite Sales Part Numbers are shown in parentheses immediately following or below the Parts and Accessories Part Numbers.

For example, refer to Section 96, Page 593, Group 9601. The Parts and Accessories Part Number for a carburetor air cleaner element used on a 1962 Ford with a 6 cylinder 223 C.I.D. engine is C3VY 9601-A and the Autolite Sales part number is FA-4. In the catalog this item will be shown as C3VY 9601-A (FA-4).

SOFT TRIM

Soft Trim parts are arranged in separate sections according to year, that is 1960, 1961 etc. The colored upholstery swatches must be retained from your loose leaf catalog as these have not been included in this publication.

The Soft Trim Sections include only those items which were available for service at the time of printing. Items not shown in the catalog must be improvised or procured locally. Use the following instructions in order to locate the appropriate Soft Trim part numbers.

SOFT TRIM PARTS for ALL MODELS Consists of:

- (1) Parts cataloged by color (e.g. Groups 02344-5, 24346-7, etc.).
- (2) Parts cataloged by trim code (e.g. Groups 23942-3, 62900, etc.).
- (3) Miscellaneous parts (e.g. Groups 47042, 63501, etc.).

PARTS CATALOGED BY COLOR:

- (1) Identify Model, Body Type and Color of desired part.
- (2) Determine Group Number of part.
- (3) Locate appropriate color listed at top of page.
- (4) Match color with model and body type to select desired part number.

FOR EXAMPLE: Should a Black Front Floor Mat (Group 13000-1) be desired for a 1960 Falcon -

- (1) Refer to Group 13000-1
- (2) Read list of colors above title to find "Black"
- (3) Read down to find "X"
- (4) Part number shown is CODZ 6413000 and suffix in "Black" column is EAB.

PARTS CATALOGED BY TRIM CODE:

- (1) Identify Model, Body Type and Trim Code.
- (2) Determine Group Number of part.
- (3) Locate appropriate Trim Code (listing of Trim Codes precedes each body type).
- (4) Match Model and Body with Trim Code to select part number.

FOR EXAMPLE: Should a Front Seat Cushion Cover (Group 62900) be required for a 1964 Ford, Body Type 54E, Trim Code 32 -

- (1) Refer to Group 62900
- (2) Read down to locate A(54E)
- (3) Read Trim Codes (listed numerically) to find Trim Code 32
- (4) Part number shown is C4AZ 6262900 and suffix listed is ADA.

PROCEDURE FOR USING CATALOG

Following is a recommended procedure for using this catalog.

Should an inquiry be received for a rear brake carrier plate for a 1963 Thunderbird, use the following steps.

- A. Refer to the Quick Reference Index on the cover of this catalog. The index shows that parts for Wheels and Brakes are shown in Section 10 through 24 of this catalog. The first section (10) in this group will contain an alphabetical index.
- B. Refer to the Alphabetical Index at the beginning of Section 10 under heading "Brake System"; find name "Plate (rear carrier)". The group number will be shown as 2211-12.
- C. Refer to group 2211-12 and locate the year 1963 in the column head "Year". Refer then to column headed "Model" for "S" which indicates Thunderbird. The part number will be shown as C3SZ 2211-A for right hand and C3SZ 2212-A for left hand.

In the event the proper nomenclature is in doubt, an alternate method of locating basic part number would be as follows.

- A. Refer to the Quick Reference Index on the cover of the Illustration Catalog. The index shows that parts for Wheels and Brakes are shown in Section 10 through 24 of the Illustration Catalog. The first section (10) in this group will contain an index for all illustrations in Sections 10 through 24.
- B. Refer to the Illustration Index at the beginning of Section 10 under heading "Front and Rear Brakes" and find the illustration applicable to rear brakes for 1963 Thunderbird. (Page 49).
- C. Refer to the illustration on page 49 and identify the proper part. It will show a Group number of 2211-12.
- D. Refer to Group 2211-12 and locate the year 1963 in the column headed "Year". Refer then to column headed "Model" for "S" which indicates Thunderbird. The part number will be shown as C3SZ 2211-A for right hand and C3SZ 2212-A for left hand.

HOW TO ORDER PARTS

When ordering parts, always give the complete part number.

In the event the part number is not known, the following information should be included.

- A. Complete description of part.
- B. Model year and body type
- C. Dimension, number of teeth, size, etc.; if possible rough sketch of part.
- D. If applicable to engine, transmission, axle, steering, etc.; specify type; such as 390 cubic inch, Fordomatic, Power Steering, etc.
- E. Advise how shipment is to be made - Freight, Express, Air, Parcel Post.

MAJOR GROUP INDEX (Alphabetically Listed)

Below are various major groups appearing in the Chassis and Body Sections of this catalog. An alphabetical index covering the service details and related parts for each major group of the Chassis parts area of this catalog is listed at the beginning of the section indicated below. A separate Body Index Section is shown at the beginning of the Body parts area of this catalog. In addition, a Quick Reference Index is shown on the cover.

IMPORTANT: AS EACH INDIVIDUAL EXPANSION SERIES BECOMES EXHAUSTED OF NUMBERS, ANOTHER SERIES WILL BE ESTABLISHED BY USE OF THE NEXT ALPHABETICAL EXPANSION LETTER SUCH AS 'B' thru 'Z'.

TYPICAL PATENT PLATE - 1960/62

The Patent Plate is located on the left front body pillar on Galaxie and Thunderbird models and on the lock face of left front door on Fairlane and Falcon passenger models. The rating plate for Falcon bus models is attached to the left front door hinge pillar.

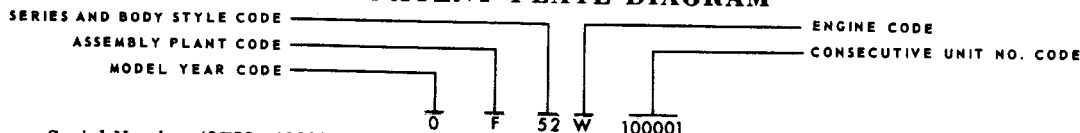

The following diagram of the Patent Plate specifies, in the Serial Number: the Model Year, Assembly Plant, Series and Body Style, Engine Type and numerical sequence of assembly.

Indicated in the body specifications are the Body Type, Exterior Paint Color, Trim Scheme, Production Date, Transmission Type and Rear Axle Ratio.

IMPORTANT: Always furnish appropriate Patent Plate information and DSO number if applicable when ordering parts not listed in the Catalog. On 1962 models if the unit is built on a DSO, FSO or PAO (special orders) the complete order number will appear in the DSO space.

The Falcon bus models are cataloged with the Econoline Series. Rating plate information concerning Falcon bus models will be found in the General Information section of the Truck Master Parts Catalog Form AF 7636-A.

3A719 POWER STEERING HOSE - APPLICATION CHART				

All power steering hoses are listed under basic number 3A719.
The description column indicates functions of the parts.

When hose assemblies are no longer available for service the detail parts must be used.

These are listed in assembly part number sequence beginning on page 89.

Also see assembly instructions and related illustrations beginning on page 91.

INSTALLATION INSTRUCTIONS

FOR

REPLACING P/S HOSE ASSEMBLIES WITH UNIVERSAL FITTINGS

1. Keep old hose as a guide for length and shape.
2. Assemble new hose, using illustration on page 91 as a guide.
3. Fittings may be reused if rubber portion of hose subsequently requires replacement.

3A719 POWER STEERING HOSE - continued

WET A SHARP KNIFE BLADE AND CUT HOSE ENDS TO LENGTH. PLACE SHELL IN VISE. SCREW HOSE COUNTER-CLOCKWISE IN SHELL UNTIL HOSE BOTTOMS. BACK OFF APPROXIMATELY 1/4 TURN.

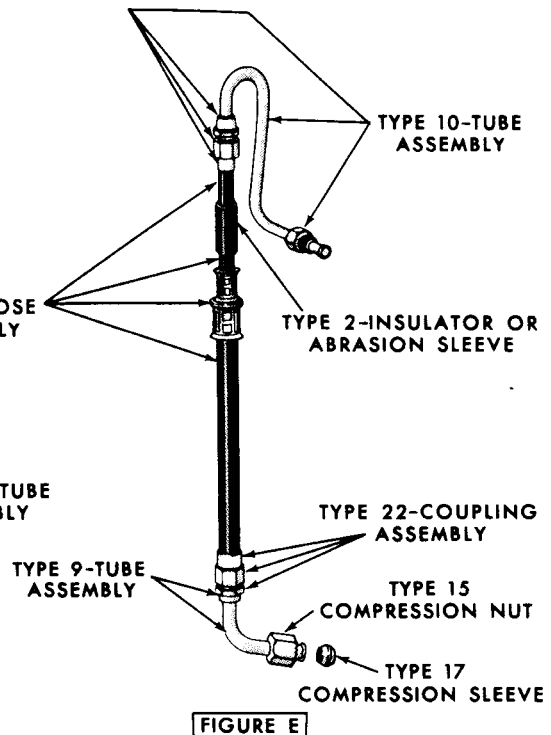

TO ASSEMBLE REUSABLE COUPLINGS TO WIRE BRAID HOSE—PLACE HOSE IN VISE AND CUT END SQUARE TO LENGTH. USE FINE TOOTH HACKSAW (18 TEETH PER INCH PREFERRED). CUT WITH KNIFE THRU COVER AROUND HOSE USING NOTCHES ON SHELL FOR LENGTH GUIDE. SLIT COVER FROM CUT TO END. REMOVE OUTER COVER USING SCREW DRIVER AND PLIERS. ASSEMBLE AS SHOWN IN FIGURE A.

INSERT LUBRICATED MALE BODY INTO COUPLING SHELL AND TURN CLOCKWISE UNTIL HAND TIGHT. APPLY WRENCH AND SCREW MALE BODY FULL LENGTH INTO SHELL.

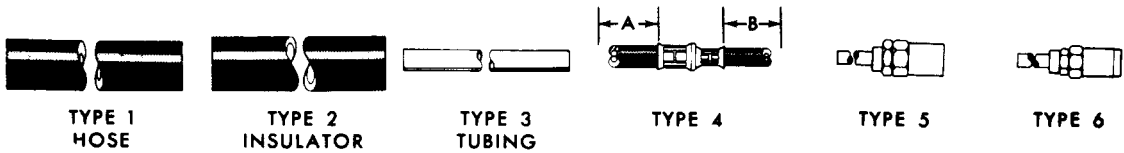

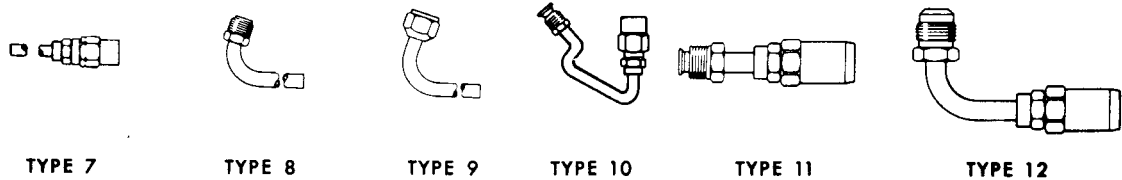

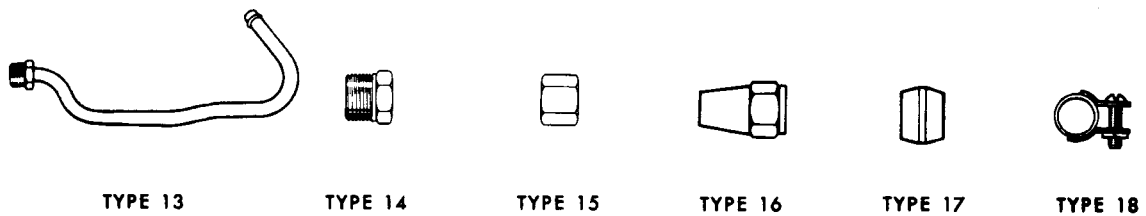

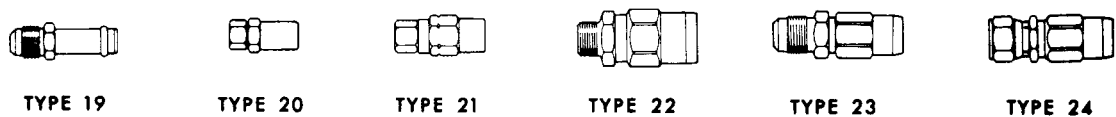

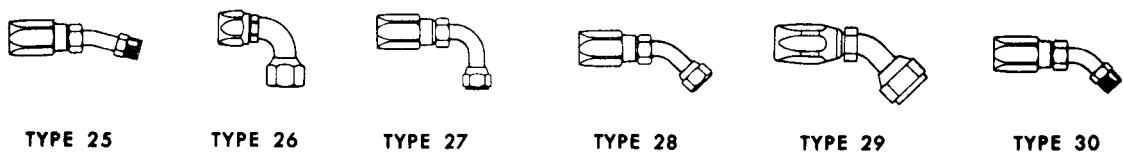

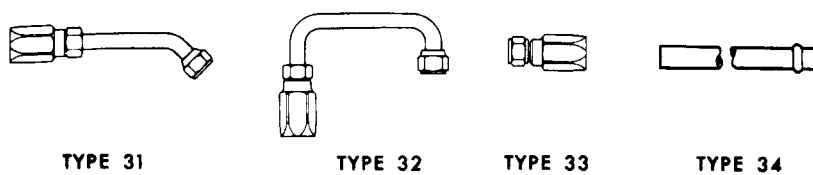

LUBRICATE MALE AND FEMALE THREADS OF COUPLING BODY

FORD DESIGN REAR AXLE MODEL IDENTIFICATION TAG

Effective with the 1963 models, a service identification tag was attached to the Ford design rear axles as illustrated below. Inquiries pertaining to rear axles used on 1963 and subsequent models should include the axle model identification number.

**REAR AXLE IDENTIFICATION CHART**

The following chart lists models of Ford design rear axles built since 1963 in alphabetical order. Axle model suffixes with numerical codes are shown only where interchangeability is affected by type of differential or size of differential bearing. This chart will assist in determining the application for rear axle components which are cataloged throughout Sections 40 & 46 by size, description, ratio, type of differential or reference to size of ring gear, wheel bearings & differential bearings. Abbreviations used in the "type", "whl. brg." and "diff. brg. & cup" columns have the following meanings:

TYPE	
C.....Conventional	2 pinion - non-locking
C4.....Conventional	4 pinion - non-locking
E.....Equalock	2 pinion - limited slip

4602 DRIVE SHAFT and RELATED PARTS

Drive Shafts Group 4602, Universal Joints Group 4635 and Knuckle & Plug Assemblies Group 4841 are cataloged in chart form under group numbers 4602. The drive shafts and related parts are listed by model years and within the model years designated by car line. The various codes designating the universal joints and knuckle & plug assemblies are explained below. Identification charts showing the various dimensions of universal joints and knuckle & plug assemblies appear under Groups 4635 and 4841.

P-3895

Universal Joint Codes used throughout the chart apply to part numbers as indicated
Also refer to Group 4635 for Universal Joint Identification Chart

EXHAUST SYSTEM APPLICATION CHART

The Exhaust System Application Chart is designed to facilitate the identification of the following related items: Inlet Pipe (Group 5246-48), Inlet Pipe Extension (Group 5A212-13), Muffler (Group 5230) and the Outlet Pipe (Group 5255). The chart is arranged first by model year and secondly by car line within each model year.

Physical characteristics or dimensions for each part and also standard or attaching parts are shown under the respective group. For example, the dimensions for the Inlet Pipe will be found under Group 5246, for Muffler under Group 5230, etc.

The following symbols are used to designate side and type: D-Dual, L-Left, R-Right, S-Single.

1960/ EXHAUST SYSTEM HANGER and BRACKET LOCATION CHART

EXHAUST SYSTEM HANGERS AND BRACKETS

Effective with the 1964 models, all new hangers and new support brackets related to the exhaust system have been assigned one of the following basic or group numbers:

5A246 if located on the inlet or forward side of the muffler.

5260-1 if located on the outlet or rear side of the muffler.

5277-8 support brackets regardless of location.

To avoid additional part number changes, all bracket and hanger part numbers for past models have been regrouped according to function and location under the above basic or group numbers. An illustration showing hanger and bracket locations of typical exhaust systems for 1960/ models is shown on Page 131

HOW TO IDENTIFY MANUAL TRANSMISSIONS and RELATED PARTS

Seven types of manual transmissions have been used as optional equipment for 1960 and subsequent model years.

PARTS DIRECTLY RELATED TO THE OPERATION OF THE TRANSMISSION ASSEMBLY, SUCH AS CASE, GEARS, SHAFTS, EXTENSIONS, ETC., ARE LISTED IN PARTS LISTS SECTIONS FOR EACH BASIC TRANSMISSION TYPE AS INDICATED BELOW.

PARTS NOT DIRECTLY RELATED TO THE TRANSMISSION ASSEMBLY, SUCH AS GEAR SHIFT OR CLUTCH MECHANISM, ARE LISTED IN SECTIONS 71 THRU 75.

Description and Type	Catalog Identification	Parts List Section	Years
3 Speed-2.77	2.77	70.1	60/
3 Speed-2 15/16	2 15/16	70.2	60/62
3 Speed-Overdrive	O/D	70.3	60/
3 Speed-3.03	3.03	70.4	63/
4 Speed-Dagenham	D/4/S	70.5	62/
4 Speed-Ford	F/4/S	70.6	64/
4 Speed-Warner	W/4/S	70.7	60/

Each transmission is identified by a number stamped directly on the transmission case or appearing on a metal tag or plate attached to the case. Refer to page 263 of this section for the locations of the identification numbers.

Each basic transmission type is identified by several numbers which reflect the different model years or the significant changes made within the same model years.

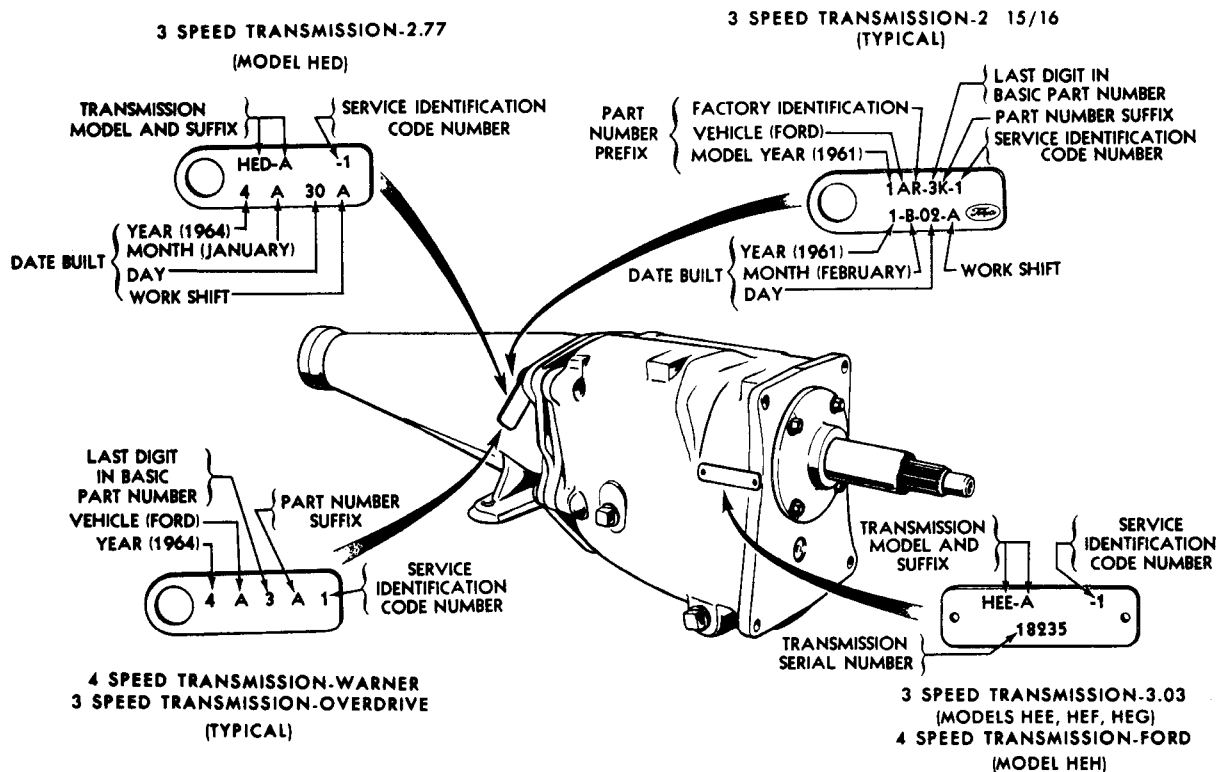

A guide listing the transmission identification numbers in numerical and alphabetical sequence appears on page 264 of this section. When the transmission identification number is known, simply refer to this guide for the appropriate transmission type, year, parts list section and illustration section and page number.

Manual transmissions and their related parts can also be identified by year, model, engine, etc. on pages 265 and up of this section.

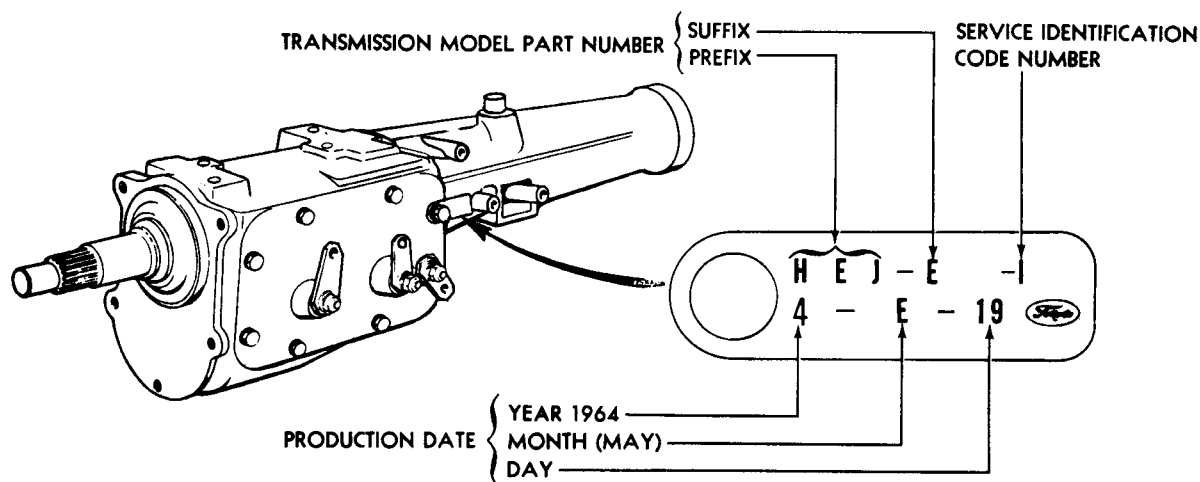

Manual transmission illustrations are shown in Illustration Sections 70 thru 75 of the Illustrations Catalog, Form AF 7682.

An index cross referencing part name to basic number appears at the beginning of this section on pages 259, 260 and 261.

HOW TO IDENTIFY AUTOMATIC TRANSMISSIONS and RELATED PARTS

Three basic types of automatic transmissions have been used as optional equipment for 1960 and subsequent model years.

PARTS DIRECTLY RELATED TO THE OPERATION OF THE TRANSMISSION ASSEMBLY, SUCH AS: CASE, EXTENSION HOUSING, GEAR TRAIN, ETC., ARE LISTED IN PARTS LISTS SECTIONS FOR EACH BASIC TRANSMISSION TYPE, AS INDICATED BELOW.

DESCRIPTION and TYPE	CATALOG IDENTIFICATION	PARTS LISTS SECTION	YEARS
Fordomatic 2 speed single range	F/M/2	A70. 2	1960/64
Cruise-O-Matic 3 speed:	C/M	A70 3	
Model (FM)	FM	A70. 3	1960
Model (FX)-light duty	FX	A70. 3	1960/
Model (MX)-heavy duty	MX	A70. 3	1960/
Automatic 3 speed dual range	C4	A70. 4	1964/
Model (XP)			

Each transmission is identified by a number stamped directly on the transmission case or appearing on a metal tag or plate attached to the case.

Refer to page 327 for the illustrations showing the locations of the Service Identification numbers.

Each basic transmission type is identified by several numbers which reflect the different model years or the significant changes made within the same model years.

A guide listing the transmission identification numbers in numerical and alphabetical sequence by identification number appears on page 328. When the transmission identification number is known simply refer to this guide for the appropriate transmission type, year, parts list and illustration section.

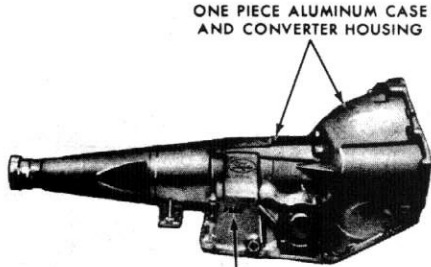

Automatic transmissions and their related parts can also be identified by year, model, engine, etc., in the Transmission Application Chart on page 329.

PARTS NOT DIRECTLY, BUT FUNCTIONALLY RELATED TO THE OPERATION OF THE TRANSMISSION ASSEMBLY, SUCH AS: CONTROL SELECTOR MECHANISMS, OIL COOLING SYSTEMS ETC., ARE LISTED IN SECTIONS A71 THRU A74.

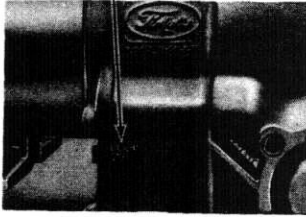

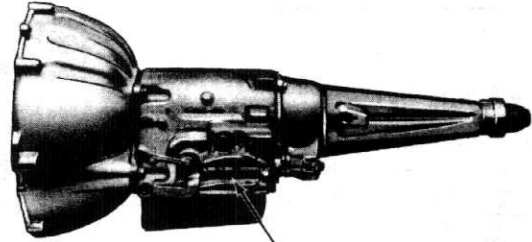

A Part Name Index arranged alphabetically, cross referencing part name to basic number appears at the beginning of this section on pages 321 thru 325.

Automatic transmission illustrations are shown in the various sections of the Illustration Catalog, Form AF 7682 as indicated below.

MAIN CONTROL IDENTIFICATION CHART

An identification number appears on a metal tag at the lower end of the main control assembly. The following chart will provide quick identification of the service part number when the identification number is known. The main control assembly may also be selected by model, year and description under Group No. 7A100 which follows the chart.

MAIN CONTROL IDENTIFICATION CHART

An identification number appears on a metal tag at the lower end of the main control assembly. The following chart will provide quick identification of the service part number when the identification number is known. Also the main control assembly may be selected by model, year and description under Group No. 7A100 which follows the chart.

HOW TO IDENTIFY CARBURETORS and RELATED PARTS

To facilitate the identification of service kits and parts for a specific carburetor, parts lists or bills of material are provided in Sections 95.1 and up, of this catalog for each carburetor assembly. It is necessary first to identify the carburetor assembly per the instructions that follow.

Carburetors can be identified by the stamping number shown on the carburetor or on a metal tag attached to the carburetor. The location of this stamping number differs for the various carburetors - see the Carburetor Identification Chart beginning on Page 470 of this section.

Each carburetor for 1960 and subsequent models has an identification tag. An illustration and explanation of the carburetor identification tags are shown on Page 470 of this section.

If either the tag or stamping identification number is known, the related carburetor and carburetor parts list numbers can be determined from the Guide beginning on Page 470 of this section.

Carburetors and their parts lists can also be identified by Engine, Model Year, etc. in the Application Identification Chart beginning on Page 473 of this Section. Also shown in the Carburetor Application Chart is the page number for a typical parts illustration for each carburetor assembly.

Carburetor illustrations are shown in Illustration Section 95 of Form AF 7682 .

Parts lists are grouped by type and engine and each group of related carburetor parts lists is shown in a separate section. The section number can readily be identified with the carburetor parts list numbers as shown in the following example:

Carburetor Type	Engine No. of Cyls.	C.I.D.	Parts List Number	Catalog Section No.
Ford 1/B	6	144	1A, 1B, 1C etc.	95.1
Holley 1/B	6	144	2A, 2B	95.2
Ford 2/B	8	221	9A, 9B, 9C	95.9
Ford 4/B	8	352	15A, 15B, 15C etc.	95.15

For ready reference, kit part numbers are shown at the beginning of each parts list section. A listing of components for each kit is shown in Section 95A. Refer to the Index at the beginning of Section 95A for page number of known kit.

Carburetor attaching parts are shown at the beginning of their respective parts lists following the part numbers for the kits.

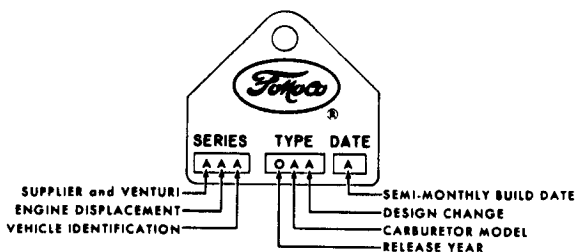

To identify the parts or kits for a specific carburetor it is only necessary to refer to the related parts list and parts illustration.

A Part Name Index in alphabetical order is shown at the beginning of the Fuel System in Section 90.

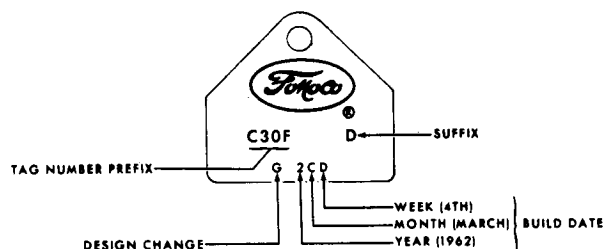

IMPORTANT: Always furnish appropriate Patent or Warranty Plate information and DSO number if applicable when ordering parts not listed in the Catalog.

NOTE 1A Stamping identification is located on main body

NOTE 1B Stamping identification is located on fuel inlet boss

NOTE 13 Service package includes mounting gasket

NOTE 20 For use on Standard and Overdrive transmissions remove dashpot and attaching parts

NOTE 31 Not used with Emission Reduction

NOTE 32 Used with Emission Reduction

NOTE 38 Use less dashpot and install CODE 9B572-B spark valve for standard transmission

NOTE 39 Service pkg. contains (1) CODE 9455-A gasket, (1) CODE 9B572-B spark valve, (1) CODE 9A588-A gasket

NOTE 44 Service pkg. includes (1) C3DZ 9447-A gasket

NOTE 45 Except with rocker arm cover type emission reduction

NOTE 46 With rocker arm cover type emission reduction

NOTE 66 Use C2DZ 9G545-A adaptor kit (carburetor) when using C3OZ 9510-T or C5OZ 9510-H to replace C2DZ 9510-B carburetors

NOTE 67 Service pkg. includes (1) B2A 9827-A fuel inlet adaptor gasket

CARBURETOR KIT PARTS LISTS

Instructions for identifying Carburetor Assemblies and their related Parts List Numbers are shown at the beginning of Section 95.

For ready reference, kit part numbers are shown at the beginning of each parts list in Section 95.1 and up.

Included in Section 95A is a listing of components for each kit.

Always refer to the following Index for page numbers on which components are listed.

HOW TO IDENTIFY GENERATOR PARTS

To provide a positive method of identifying parts for a generator, each generator is assigned a Catalog Symbol. When the Catalog Symbol is known, refer to the basic group of the required part and select the part number applicable to the known Catalog Symbol.

Two charts are furnished to aid in the identification of generators and related parts. The Generator Identification Chart on pages 613 through 616 provides a quick identification for the generator, pulley and fan as well as the Catalog Symbol, when the identification marking located on the generator housing is known.

The Generator Model Application Chart which begins on page 617 of this section indicates the Catalog Symbol, the service generator and the voltage regulator. This chart is arranged by year, model and engine.

10039 GENERATOR MOUNTING BRACKETS

Generator mounting parts are listed in chart form following the illustration below. Refer to the illustration to determine the name of the part required. Refer to the chart to select the appropriate part number. The chart is listed by year, model, engine and generator make and amperage.

Attaching parts such as bolts, nuts, etc. are listed by code number. A listing of the code numbers and their corresponding part numbers and descriptions appears at the end of the chart.

HOW TO FIND ALTERNATORS and COMPONENTS

By IDENTIFICATION:

1. Refer to Identification Chart below.
2. Check marking (on alternator housing) against Identification numbers to determine part numbers of service alternator, pulley, fan & spacer.

By MODEL APPLICATION:

1. Refer to Model Application Chart beginning on page 648
2. Refer to appropriate Year, Model and Engine.
3. Select and refer to appropriate Parts List Section and Number.
4. If basic number is not known refer to Illustration Page shown, or to Index beginning on page 609.
5. Select part number shown for affected Parts List. If more than one part number is shown refer to Description and Restrictions for clarification.
6. Quantity of parts shown in columns A, B or C etc.
7. Parts are listed numerically.

IDENTIFICATION EXAMPLE: C3SF 10300-A is listed in Parts List Section 103.3, Column 3D.
 MODEL APPLICATION EXAMPLE: 1963 Thunderbird (8 cyl.390) uses 40 amp. Ford Alternator (C3SZ 10346-A).
 Internal Parts for this alternator are listed in Parts List Section 103.3, Column 3D.

10A313 ALTERNATOR MOUNTING BRACKETS

Alternator mounting parts are listed in chart form following the illustration below. Refer to the illustration to determine the name of the part required. Refer to the chart to select the appropriate part number. The chart is listed by year, model, engine and alternator make and amperage.

Attaching parts such as bolts, nuts, etc. are listed by code number. A listing of the code numbers and their corresponding part numbers and descriptions appears at the end of the chart.

10718 BATTERY MOUNTING PARTS

Battery mounting parts are listed in chart form following the illustration below. Refer to the illustration to determine the name of the part required. Refer to the chart to select appropriate part number. The chart is listed by year, model and amperage of battery.

Attaching parts such as bolts, nuts, etc., are listed by code number. A listing of the code numbers and their corresponding part numbers and descriptions appears at the end of the chart.

HOW TO FIND STARTERS and COMPONENTS

By IDENTIFICATION:

1. Refer to Identification Chart below.
2. Check marking (on starter housing) against Identification numbers.
3. Select and refer to appropriate Parts List Section and Number.
4. If basic number is not known refer to Illustration Page shown, or to Index beginning on Page 609.
5. Select part number shown for affected Parts List. If more than one part number is shown refer to Description and Restrictions for clarification.
6. Quantity of parts shown in columns A, B or C etc.
7. Parts are listed numerically.

By MODEL APPLICATION:

1. Refer to Model Application Chart beginning on next page.
2. Refer to appropriate Year, Model and Engine.

Identification ExampleModel Application Example

C4OF 11001-A is listed in Parts List Section 110.2, Column 2C.
 1964 Falcon (8 cyl.) uses starter C2OZ 11002-A. Internal parts for this starter are listed in Parts List Section 110.2, Column 2C.

HOW TO FIND DISTRIBUTORS and COMPONENTS

To find Distributor (other than Calibration) Parts:

(Calibration Parts are listed by Code Number on Page 687.

By IDENTIFICATION:

1. Refer to Identification Chart below.
2. Check marking (on distributor) against identification numbers.

By MODEL APPLICATION:

1. Refer to Model Application Chart beginning on Page 688.
2. Refer to appropriate Engine, Year and Model.

3. Select and refer to appropriate Parts List Section and Number.
4. If basic number is not known refer to illustration page shown, or to Index on page 609
5. Select part number shown from appropriate Parts List. If more than one part number is shown, refer to Description and Restrictions for clarification.
6. Quantity of parts shown in columns A, B, C etc.
7. Part numbers are listed numerically.

Identification Example: C3OF 12127-A is listed in Parts List Section 120.4, Column B. Calibration parts are listed by code number on page 687. (Cam-basic 12210, Springs-basic 12191-2 and Stop-basic 12202) are listed by Code Number etc.

Model Application Example: For an 8 cyl. 390 engine on a 1963 Ford use distributor C3AZ 12127-AH (identified C3AF 12127-AH). Internal parts for this distributor are listed in Parts List Section 120.4, Column R.

HOW TO FIND DISTRIBUTOR CALIBRATION PARTS
(Primary, Secondary & Vacuum Springs, Cam & Stop)

You must know the Distributor Identification Number -

1. Refer to Identification Chart beginning on page 683.
2. Check distributor for marking or identification number and locate same in chart.
3. Find Calibration parts listed by code number in adjacent columns.
4. Refer to Calibration Code and Part Number Cross Reference listed below for appropriate part number.

Example: Calibration parts for Distributor identified C3OF 12127-A are -

PRIMARY SPRING - 221 - B8QH 12192-B, SECONDARY SPRING - 201 - FFA 12191-A,

VACUUM SPRING - 218 - B7AZ 12192-C, CAM - 101 - B9AF 12210-A and STOP - 1 - FEW 12202-A

WIRING LOOM MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE FOR 1960 and SUBSEQUENT MODELS

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists in numerical sequence the Wiring Loom Markings or Tag Numbers for 1960 and subsequent model vehicles. For many vehicles the Service Wiring Part Number will be the same as the Loom Marking or Tag Part Number. This type of replacement will cause little or no installation problems. However, when the Service Wiring differs from the Loom Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory. Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the loom identification marking or tag number is not known.

19C705-8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS				

Air conditioning hose assemblies are serviced in one of the following ways:

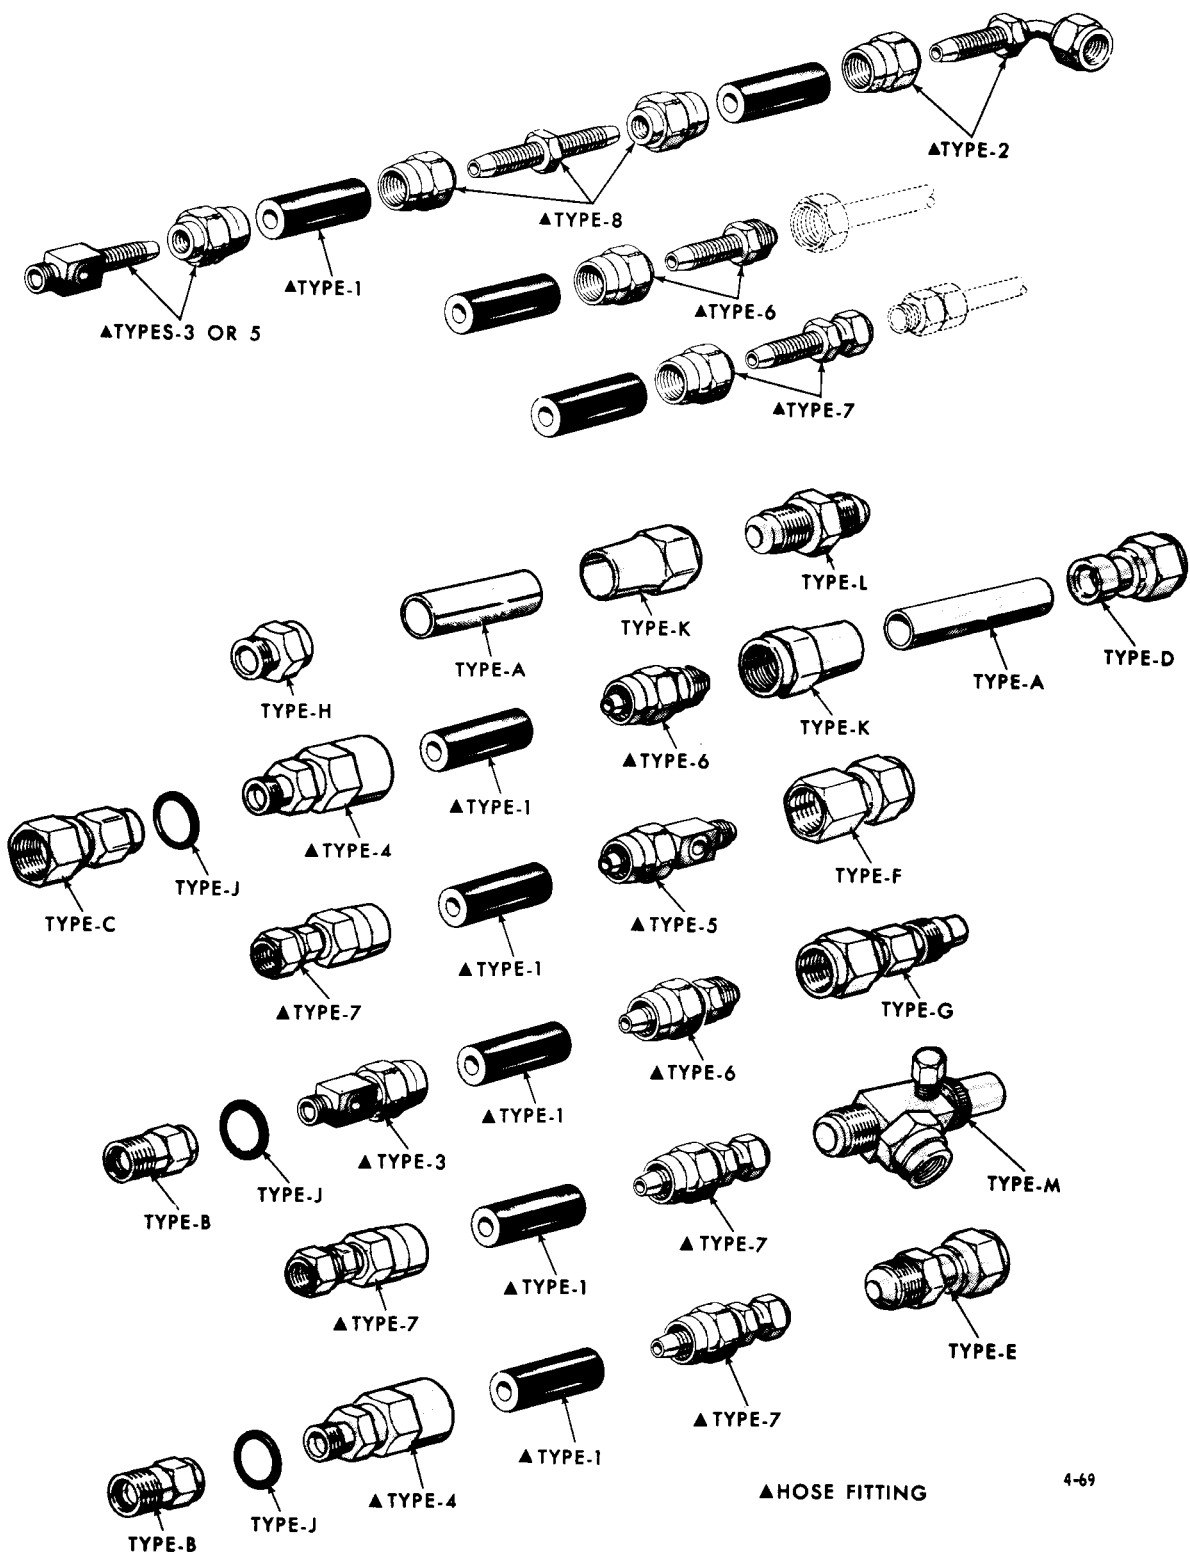

1. Hose assembly - Certain production hose assemblies are available for 1960/64.
Example - For 1963 Ford (8 cyl.) with hang-on A/C the hose assembly from Compressor to Condenser (19972) serviced as C3AZ 19972-A as listed below.
2. Fabricate hose assembly from details listed on pages 894 through 896 according to visual identification of parts required.
Example - Use bulk hose and/or bulk tubing and cut to fit. Add necessary fittings as illustrated on pages 894 and 895 and listed on Page 896.

In addition, the following repair procedures are recommended.

- a. **WHERE A DOUBLE-BRAID RUBBER AIR CONDITIONER HOSE HAS DEVELOPED A LEAK OR BREAK, and THE SITUATION IS SUCH THAT A SPLICER CAN BE USED**
A section of approximately 3/4" is removed from the hose. The proper diameter splicer is then installed.
- b. **WHERE MORE HOSE MUST BE REMOVED THAN CAN BE REPLACED BY ONE SPLICER**
(such as a long diagonal cut)
- c. **WHERE COMPLETE HOSE REPLACEMENT IS REQUIRED**
(Using the original hose as a pattern the required length is cut from replacement hose and fittings of the required diameter installed.)
- d. **WHERE TUBING IS REQUIRED ON ONE OR BOTH ENDS**
Using the original tubing as a pattern, a new section of tubing is cut to the required length, ends are flared and the proper fittings are installed.

BODY BOLT CHART

HOW TO FIND BODY BOLTS and RELATED PARTS

- 1) To determine Body Bolts and Related Parts you must know:
 - a) YEAR
 - b) CAR LINE
 - c) BODY TYPE
 - d) BODY BOLT LOCATION
 - e) NAME OF PART
- 2) Using this information and the typical illustration shown below, refer to the listing beginning on page 936.
- 3) Locate the appropriate Code Number for Bolts, Nuts, Retainers etc.
- 4) Translate the Code Number into a Service Part Number by referring to the Cross Reference listing on page 940.

Read down to locate Code Number.

Read across to locate Service Part Number.

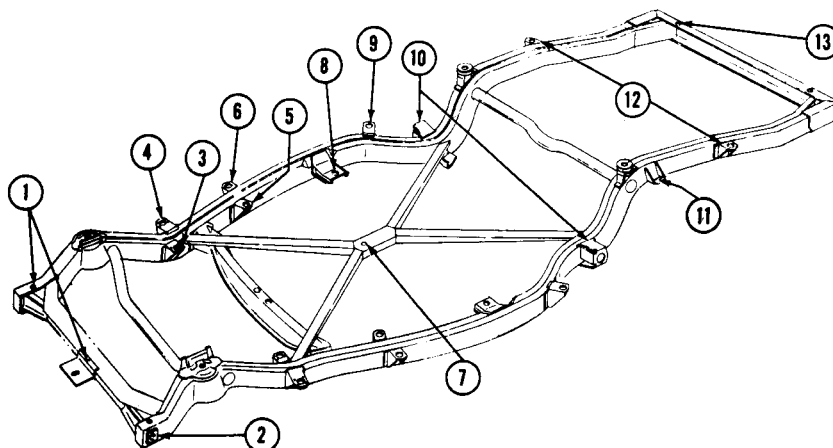

EXAMPLE:

a) Year	1964
b) Car Line	FORD
c) Body Type	71
d) Body Bolt Location	Number 3
e) Name of Part	Absorber, Bolt, Flat washer, Lockwasher, Retainer, Shim and Spacer

Code Numbers listed are:

Part numbers shown for these Codes are:

Absorber ---74	C4AZ 6200154-A
Bolt ---64	C1AE 6A527-C
Flat washer---86	44735-S8(X32)
Lockwasher---90	34808-S8(X67)
Retainer ---98	C4AZ 6200163-A
Shim ---67	C3AZ 8126-A
Spacer ---★	Not serviced
